LL1x30-E-CV24

30 W Constant Voltage LED driver

Helvar

freedom in lighting

30 W 220-240 VAC 50-60 Hz

- 24 V constant voltage output
- SELV protection for safety and flexibility in luminaires
- Open circuit, short circuit and overload protection
- Suitable for Class I and Class II luminaires
- Strain reliefs for independent use
- Suitable for use with LL1xCV-DA driver extension in DALI dimmable solutions

Mains Characteristics

Voltage range	198-264 VAC
Max mains current at full load	0.17 A
Frequency	50 - 60 Hz
Power factor at full load	0.95
THD at full load	< 15 %
Input Power at no load	< 0.5 W
Leakage current to earth	< 0.7 mA
Tested surge protection	1 kV L-N, 2 kV L-GND (IEC 61000-4-5, performance criteria B)
Tested fast transient protection	2 kV (IEC 61000-4-4, performance criteria B)

Load Output (SELV < 60 V)

Output voltage (U-OUT)24 VOutput voltage tolerance± 5 %Max output current (I-OUT)1.25 AMax output power30 WEfficiency, at full load86 %

Operating Conditions and Characteristics

Max.temperature at t _c point		80 °C
Ambient temperature range		-15+45 °C
Storage temperature range		-40+80 °C
Maximum re	elative humidity	No condensation
Life time	(90 % survival rate)	50 000 h, at t _c = 70 °C
		30 000 h, at $t_c = 80 \text{ °C}$

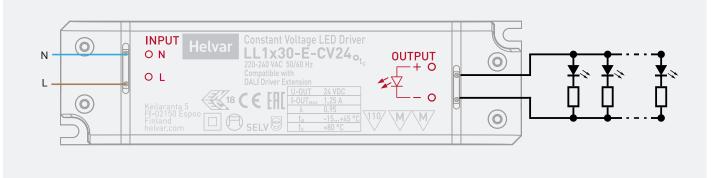

Connections and Mechanical Data

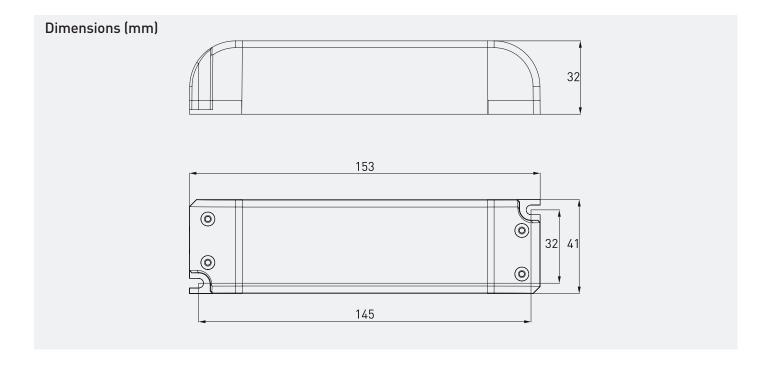

Wire size	0.5 – 1.5 mm ²
Wire type	Solid core and fine-stranded
Wire insulation	According to EN 60598
Maximum driver to LED wire length	5m
Weight	150 g
IP rating	IP20

LL1x30-E-CV24

Connections

Quantity of drivers per miniature circuit breaker 16 A Type C

Type-C MCB's with trip characteristics according to EN 60898 are recommended.

Installation and conformity

LL1x30-E-CV24 LED driver is suited for either built-in and independent luminaire usage. In order to have safe and reliable LED driver operation, the LED luminaires will need to comply with the relevant standards and regulations (e.g. IEC/EN 60598-1). The LED luminaire shall be designed to adequately protect the LED driver from dust, moisture and pollution. The luminaire manufacturer is responsible for the correct choice and installation of the LED drivers according to the application and product datasheets. Operating conditions of the LED drivers may never exceed the specifications as per the product datasheets.

Installation & operational considerations

Maximum t, temperature:

- Reliable operation and lifetime is only guaranteed if the maximum t, point temperature is not exceeded under the conditions of use
- Ensure that the tc point temperature does not exceed the specified value on the datasheet

Installation site:

• The general preferred installation position of LED drivers for independent use is to have the top cover facing upwards
